

Contents

1	Groups of transformations	1
1.1	Symmetry of the equilateral triangle	2
1.2	Active and passive transformations	3
1.3	The group multiplication table	4
1.4	Symmetry of the circle	6
1.5	Transformation groups	8
1.6	Symmetry and symmetry groups	11
1.7	The symmetric group S_n	12
1.8	Other ways to factorize permutations	14
1.9	Homogeneous spaces	16
1.10	Fixed point group and cosets	17
1.11	Permutation of boxes and permutation of balls	18
	Problems	22
2	Group theory	25
2.1	The group axioms	25
2.2	Left and right translation, conjugation	28
2.3	Example: conjugation classes in S_n	29
2.4	Subgroups	30
2.5	Cosets	31
2.6	Example: normal subgroups of S_n	32
2.7	Factor groups	33
2.8	Homomorphisms and isomorphisms	34
2.9	Direct and semidirect product	35
2.10	Group extension	37
	Problems	39
3	Finite dimensional group representations	41
3.1	Matrix representations	42
3.2	Reducible and irreducible representations	44
3.3	Direct sum and direct product	45
3.4	Schur's lemma	49
3.5	Unitary and orthogonal representations	51
3.6	Characters	53
3.7	The contragredient representation	55

4	Complex representations of finite groups	57
4.1	Unitarity and reducibility	57
4.2	The group algebra	58
4.3	The regular representations	59
4.4	Representation matrices in the group algebra	61
4.5	The irreducible matrix representations	62
4.6	The centre of the group algebra	65
4.7	More about characters	68
5	Linear groups	73
5.1	Orthogonal, unitary and symplectic groups	73
5.2	Examples	75
5.3	Infinitesimal transformations	76
6	Linear Lie groups	77
6.1	The exponential function	77
6.2	From Lie group to Lie algebra	79
6.3	The adjoint representation	81
6.4	From Lie algebra to Lie group	82
7	Examples of Lie groups: $\mathrm{SO}(3)$ and $\mathrm{SU}(2)$	87
7.1	The Lie group $\mathrm{SO}(3) = \mathrm{SO}(3, \mathbb{R})$	87
7.2	The adjoint representation of $\mathfrak{so}(3)$	89
7.3	Conjugation classes in $\mathrm{SO}(3)$, and invariants of $\mathfrak{so}(3)$	90
7.4	The Lie group $\mathrm{SU}(2)$	91
7.5	Covering groups	92
7.6	Lie group global structure from the Lie algebra	93
8	Example of a Lie group: $\mathrm{SL}(2, \mathbb{R})$	95
8.1	The adjoint representation of $\mathfrak{sl}(2, \mathbb{R})$	96
8.2	The relation between a Lie group and its Lie algebra	99
A	Algebraic concepts	101
A.1	Number fields	101
A.2	Algebras and division algebras	102
A.3	Algebraic numbers and algebraic integers	103
B	Finite dimensional linear algebra	107
B.1	Vector spaces	107
B.2	Linear transformations	111
B.3	Matrices	112
B.4	Subspaces	116
B.5	Trace and determinant	120
B.6	Eigenvalues and eigenvectors	122
